Five reasons to choose iFlight

A lean and agile operations and crew management solution for digital airlines

Native cloud-based SaaS platform

- Low risk from resource ownership with reduced IT costs
- Ease of access – anywhere, anytime, from any device, by any user

Highly configurable

- Modular architecture scaling to individual airline growth aspirations
- Full control over data with bespoke rules management and reporting capabilities

Situational awareness

- Instant, automated, proactive alerts for collaborated decision making
- Information provided in real time for management by exception

Broad functionality coverage

- All-inclusive solutions: Crew planning optimization, flight tracking, day of ops, and post day of ops
- Fully integrated with a single-source database and connected with external systems

Planning optimizers

- Flexibility to set crew regulations and optimizer objectives
- Higher resource utilization and productivity with low operating costs
